

Hiba KM

Full Stack Developer

✉ hibakm72@gmail.com 📞 +919746019604 🌐 Github 🌐 linkedin 📍 Malappuram, India

PROFESSIONAL SUMMARY

MERN Stack Developer specializing in MongoDB, Express.js, React.js, and Node.js. Experienced in creating responsive web applications, RESTful APIs, and implementing JWT authentication. Proficient in AI-powered development using Claude CLI, Claude sub-agents, and agentic workflows to accelerate delivery and maintain code quality. Strong skills in Redux, MongoDB optimization, and React architecture. Proven ability to deploy scalable solutions.

CORE SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, Redux, TailwindCSS, ShadCN

Backend: Node.js, Express.js, MongoDB, REST API, Python, GraphQL, Socket.io 🌐

Automation & AI: n8n, Lovable AI, Closerx AI, Flowflex, MCP, Cursor, GitHub Copilot, V0

Tools & Technologies: Figma, NPM, Vercel, Render, Hostinger, Git, Cloudinary

PROFESSIONAL EXPERIENCE

Full stack builder / AI Strategist, Liklot 12/2025 – present

- Built a real-time virtual currency exchange platform with live charting, market analytics, and coin conversion functionalities.
- Pioneered **agentic development workflows** using Claude CLI and Claude sub-agents, enabling autonomous code generation, review, and iterative refinement across the stack.
- Implemented Test-Driven Development (**TDD**) and Document-Driven Design (**DDD**) practices, maintaining thorough documentation and high test coverage throughout the development lifecycle.
- Designed interactive real-time data visualization interfaces for tracking virtual currency prices, trends, and exchange metrics.

Full Stack developer, Corpaia 06/2025 – 11/2025

- Developed and deployed **AI-integrated, responsive websites** for multiple clients, delivering a 30% faster turnaround from design to deployment.
- Translated Figma designs into high-performance web interfaces using **React, Next.js, and Tailwind CSS**.
- Tested and built automation workflows with n8n, integrating third-party APIs and automating repetitive tasks.
- Collaborated on **conversational AI experiments** using MCP and voice agent prototypes, improving interaction accuracy and latency.

MERN Stack Developer, Bridgeon 07/2024 – 06/2025
Malappuram, Kerala

- Built and maintained full-stack web applications using the MERN stack to deliver high-performance, scalable solutions.

- Designed and implemented reusable frontend components using **React**, **Redux**, and **TailwindCSS**, improving UI consistency by 25%.
- Collaborated within a 2-member team, managing tasks, version control, and delivery timelines through Agile practices.
- Managed version control using Git, implementing effective branching, merging, and pull request workflows to maintain a seamless CI/CD process and team collaboration.

PROJECTS

LIKLOT, *Virtual Currency Exchange Platform* 12/2025 – present

- Developed a real-time virtual currency charting and coin exchange platform with live price tracking, market data visualization, and currency conversion features.
- Built interactive real-time charting interfaces to track cryptocurrency prices, trends, and exchange rates using responsive and dynamic UI components.
- Implemented Test-Driven Development (TDD) and Document-Driven Design (DDD) workflows to maintain structured documentation and high test coverage throughout the development lifecycle.
- Utilized Claude CLI and AI sub-agents for AI-assisted development, improving feature implementation speed and enhancing code quality through automated reviews

Mendiv, *Health Intelligence Platform* 08/2025 – 10/2025

- Developed and deployed a premium health intelligence platform enabling users to access personalized longevity programs, biological optimization tools, and data-driven health assessments.
- Translated Figma designs into a high-performance, responsive web interface using React, Next.js, and Tailwind CSS with clean, modern UI components.
- Built structured landing pages showcasing core services like BioAlign™, NeuroSleep™, and Digital Twin, optimized for mobile, tablet, and desktop.
- Link: <https://www.mendiv.com/> 

Voxai, *voice agent(LiveKit, Python)*

- Developed a real-time conversational voice agent enabling low-latency, two-way audio streaming for natural human-like interactions.
- Integrated LiveKit for real-time audio transport and synchronization between user and agent sessions.
- Implemented custom pipelines for speech recognition, response generation, and voice synthesis using Python-based AI models.
- Optimized system performance to reduce response latency and enhance conversational fluidity across varied network conditions.
- **Link:** <https://github.com/hiba-0325/voxai> 

BrightMind, *Learning Management System (LMS)* 02/2025 – 04/2025

- Developed a full-featured LMS platform enabling educators to create, manage, and track courses with an intuitive and responsive user interface.
- Implemented secure authentication with OTP-based verification and JWT access control, ensuring safe user login and role-based permissions.
- Built RESTful APIs for course and profile management, integrated Cloudinary for image handling, and enabled features like course reviews, ratings, and Q&A.
- Designed an admin dashboard for managing users, courses, and feedback, providing clear course analytics and engagement insights.
- **Link:** <https://github.com/hiba-0325/BrightMind> 

EDUCATION

Bachelor of Computer Applications (BCA), *Indira Gandhi National Open University (IGNOU)*

- Currently Pursuing Mode: Open and Distance Learning (ODL)
